

CIT READ-ME FILE

Notes about IPC-A-600 CIS Training

1. READ THE CIT SURVIVAL GUIDE!
2. Both the Cert and Recert courses use the same CIS open book exams.
3. IPC-A-600 Certification is not revision specific and there are no changes to the CIS certificates.
4. The CIT and CIS training reports have been updated and formatted for automated data extraction into our database. It must be submitted as in a file format compatible with commonly used work processor software such as .doc or .rtf. DO NOT SUBMIT THE FILE AS A PDF. DO NOT UNLOCK OR MODIFY THE REPORT FILES IN ANY WAY.
5. PLEASE submit training reports as quickly as possible.
6. Early in 2008 IPC introduced new logos. This CD has a folder with all Logos for all certification programs. The logos are provided in many file format types suitable for printing, web posting, e-mail signature files, etc. The next time you reprint your business cards, update your web site, etc., and please use the new logos. The CD for CITs to train CIS will only have the log files for the IPC-A-600 program.
7. Slide M2-165 of the Visual files has been updated and doesn't look like the slide on page M2-170 of the IG. Please make a note on that slide in your IG that the slide in the Visual's file is the correct image.
8. Any questions, concerns or comments should be sent to certification@ipc.org.
