IPC-A-610E MIT READ-ME FILE

1. <u>Certification is NOT revision specific.</u> Any currently certified IPC-A-610 CIT can conduct CIS training on **<u>any</u>** 610 revision.

2. START BY READING THE MIT SURVIVAL GUIDE!

3. The IPC-A-610E initial certification and recertification courses both use the same CIT open and closed book exams and review quizzes.

4. The CIT and CIS training reports have been updated and formatted for automated data extraction into the IPC database. It must be saved and submitted in a file format compatible with Microsoft Word® such as .doc or .rtf. UNLESS OTHERWISE ADVISED BY IPC, DO NOT SUBMIT THE FILE AS A PDF. DO NOT UNLOCK OR MODIFY THE REPORT FILES IN ANY WAY.

5. <u>PLEASE</u> submit training reports as quickly as possible. Often the CITs you certify will contact IPC customer service within one or two days after completion of training to order CIS certificates. They cannot purchase the certificates until we receive your report of their training.

6. Early in 2008 IPC introduced new logos. This MIT CD has a folder with all logos for all certification programs. The IPC-A-610E CIT CD has only the logos for the 610 training program.

The logos are provided in multiple file format types suitable for printing, web posting, e-mail signature files, etc. THESE LOGO FILES ARE AUTHORIZED BY IPC FOR COPYING-PRINTING-ELECTRONIC DISPLAY BY CURRENTLY CERTIFIED MIT OR CIT AS APPROPRIATE. However, these IPC registered trademarks may not be altered in any way. The next time you reprint your business cards, update your web site, etc., please use the new logos.

7. Any questions, concerns or comments should be sent to certification@ipc.org.
