J-STD-001 CIT CD READ-ME FILE

1. <u>Certification is NOT revision specific.</u> Any currently certified J-STD-001 CIT can conduct CIS training on **<u>any</u>** J001 revision.

2. START BY READING THE CIT SURVIVAL GUIDE!

3. Both the J-STD-001 initial certification and recertification courses are modular and use the same CIS open and closed book exams.

4. There are no review quizzes or handouts in the J-STD-001 CIS course—suggested review questions are part of each module in the instructor guide.

5. The CIS training reports have been updated and formatted for automated data extraction into the IPC database. It must be submitted as in a file format compatible with commonly used word processor software such as .doc or .docx.

UNLESS OTHERWISE ADVISED BY IPC, DO NOT SUBMIT THE FILE AS A PDF. DO NOT UNLOCK OR MODIFY THE REPORT FILES IN ANY WAY.

6. <u>PLEASE</u> submit training reports as quickly as possible.

7. Early in 2008 IPC introduced new logos. This CIT CD has a folder with all the logos for the J-STD-001 program.

8. Any questions, concerns or comments should be sent to certification@ipc.org.
