IPC Study on the North American Labor Pool for Electronics Manufacturing

Published February 2015

Strengthening & Advancing Electronics Manufacturing Globally

TABLE OF CONTENTS

Introduction 1

Is There a Shortage of Qualified Labor for Electronics Manufacturing in North America?

 What the Data Say 2

 Who is Affected? 4

Causes of Today’s Recruitment Challenges

 Where it All Began 6

 The Industry’s Image 6

 Perceptions of Younger Workers 7

 Demand Growing Faster than Supply 10

 Manufacturers’ Constraints 11

 The Impact of On-Shoring 12

Labor Pool Gaps

 Unmet Needs of Electronics Manufacturers 13

 The Location Factor: Rural versus Urban 14

Recruiting Production Workers

 Hard-to-Fill Production Jobs 18

 Barriers to Recruitment of Production Workers 19

 How Manufacturers are Recruiting Production Workers 20

 Sources of Production Applicants and their Effectiveness 21

Recruiting Engineers and Other Professionals

 Hard-to-Fill Professional Jobs 23

 Barriers to Recruitment of Professionals 24

 How Manufacturers are Recruiting Professionals 25

 Sources of Professional Applicants and their Effectiveness 26

Training

 Training Needs 28

 Training Sources 29

 Grants and Other Sources of Funding for Training 31

 Respondents’ Comments about Training 32

Bridging the Gaps

 Legislation 33

 Government Resources Available to Manufacturers 34

 Support from Schools and Colleges 35

 Other Solutions to Consider 37

 Suggestions from Survey Respondents 38

Analysis of Strengths, Weaknesses, Opportunities and Threats in Recruiting

 North America’s Strengths 40

 SWOT Analysis 42

 Strategies 43
