

Vertical line on the left side of the page.

1. DI-water only, 2. Aqueous with additives, and 3. Organic solvents. No one product or classes of products are likely to satisfy all cleaning requirements. The cleaning agent must be matched to the soil, the substrate, the cleaning requirements, drying requirements, and other performance and environmental constraints. Inorganic soils are often referred to as hydrophilic; they dissolve effectively in

There is a broad array of aqueous cleaning agents. Each
