IPC-6012D

Qualification and Performance Specification for Rigid Printed Boards

Developed by the Rigid Printed Board Performance Specifications Task Group (D-33a) of the Rigid Printed Board Committee (D-30) of IPC

Supersedes:

IPC-6012C - April 2010
IPC-6012B with
Amendment 1 - July 2007
IPC-6012B - August 2004
IPC-6012A with
Amendment 1 - July 2000
IPC-6012A - October 1999
IPC-6012 - July 1996
IPC-RB-276 - March 1992

Users of this publication are encouraged to participate in the development of future revisions.

3 REQUIREMENTS 8
3.1 General 8
3.2 Materials 8
3.2.1 Laminates and Bonding Material 8
3.2.2 External Bonding Materials 8
3.2.3 Other Dielectric Materials 8
3.2.4 Metal Foils 8
3.2.5 Metal Planes/Cores 8
3.2.6 Base Metallic Plating Depositions and Conductive Coatings 8
3.2.7 Final Finish Depositions and Coatings – Metallic and Non-Metallic 9
3.2.8 Polymer Coating (Solder Mask) 10
3.2.9 Fusing Fluids and Fluxes 10
3.2.10 Marking Inks 10
3.2.11 Hole Fill Insulation Material 12
3.2.12 Heatsink Planes, External 12
3.2.13 Via Protection 12
3.2.14 Embedded Passive Materials 12
3.3 Visual Examination 12
3.3.1 Edges 13
3.3.2 Laminate Imperfections 13
3.3.3 Plating and Coating Voids in the Hole 14
3.3.4 Lifted Lands 14
3.3.5 Marking 14
3.3.6 Solderability 15
3.3.7 Plating Adhesion 15
3.3.8 Edge Printed Board Contact, Junction of Gold Plate to Solder Finish 15
3.3.9 Workmanship 15
3.4 Printed Board Dimensional Requirements 15
3.4.1 Hole Size, Hole Pattern Accuracy and Pattern Feature Accuracy 16
3.4.2 Annular Ring and Breakout (External) 16
3.4.3 Bow and Twist 18
3.5 Conductor Definition 18
3.5.1 Conductor Width and Thickness 18
3.5.2 Conductor Spacing 18
3.5.3 Conductor Imperfections 18
3.5.4 Conductive Surfaces 19
3.6 Structural Integrity 21
3.6.1 Thermal Stress Testing 21
3.6.2 Requirements for Microsectioned Coupons or Printed Boards 22
3.7 Solder Mask Requirements 34
3.7.1 Solder Mask Coverage 34
3.7.2 Solder Mask Cure and Adhesion 35
3.7.3 Solder Mask Thickness 35
3.8 Electrical Requirements 35
3.8.1 Dielectric Withstanding Voltage 35
3.8.2 Electrical Continuity and Isolation Resistance 35
3.8.3 Circuit/PTH Shorts to Metal Substrate 35
3.8.4 Moisture and Insulation Resistance (MIR) 35
3.9 Cleanliness 36
3.9.1 Cleanliness Prior to Solder Mask Application 36
3.9.2 Cleanliness After Solder Mask, Solder, or Alternative Surface Coating Application 36
3.9.3 Cleanliness of Inner Layers After Oxide Treatment Prior to Lamination 36

3.10 Special Requirements 36
3.10.1 Outgassing 36
3.10.2 Fungus Resistance 36
3.10.3 Vibration 36
3.10.4 Mechanical Shock 36
3.10.5 Impedance Testing 37
3.10.6 Coefficient of Thermal Expansion (CTE) 37
3.10.7 Thermal Shock 37
3.10.8 Surface Insulation Resistance (As Received) 37
3.10.9 Metal Core (Horizontal Microsection) 37
3.10.10 Rework Simulation 37
3.10.11 Bond Strength, Unsupported Component Hole Land 37
3.10.12 Destructive Physical Analysis 37
3.10.13 Peel Strength Requirements (For Foil Laminated Construction Only) 37
3.11 Repair 38
3.11.1 Circuit Repairs 38
3.12 Rework 38

Qualification and Performance Specification for Rigid Printed Boards

1 SCOPE

1.1 Statement of Scope This specification establishes and defines the qualification and performance requirements for the fabrication of rigid printed boards.

1.2 Purpose The purpose of this specification is to provide requirements for qualification and performance of rigid printed boards based on the following constructions and/or technologies. These requirements apply to the finished product unless otherwise specified:

- Single-sided, double-sided printed boards with or without plated-through holes (PTHs).
- Multilayer printed boards with PTHs with or without buried/blind vias/microvias.
- Active/passive embedded circuitry printed boards with distributive capacitive planes and/or capacitive or resistive components.
- Metal core printed boards with or without an external metal heat frame, which may be active or non-active.

1.2.1 Supporting Documentation IPC-A-600, which contains figures, illustrations and photographs that can aid in the visualization of externally and internally observable acceptable/nonconforming conditions, may be used in conjunction with this specification for a more complete understanding of the recommendations and requirements.

1.3 Performance Classification and Type

1.3.1 Classification This specification establishes acceptance criteria for the performance classification of rigid printed boards based on customer and/or end-use requirements. Printed boards are classified by one of three general Performance Classes as defined in IPC-6011.

1.3.1.1 Requirement Deviations Requirements deviating from these heritage classifications **shall** be as agreed between user and supplier (AABUS).

1.3.1.2 Space Requirement Deviations Space performance classification deviations are provided in the IPC-6012DS Addendum and are applicable when the addendum is specified within the procurement documentation.

1.3.2 Printed Board Type Printed boards without PTHs (Type 1) and with PTHs (Types 2-6) are classified as follows and may include technology adders as described in Table 1-1:

Type 1 — Single-Sided Printed Board
Type 2 — Double-Sided Printed Board
Type 3 — Multilayer Printed Board without blind or buried vias
Type 4 — Multilayer Printed Board with blind and/or buried vias (may include microvias)
Type 5 — Multilayer metal core Printed Board without blind or buried vias
Type 6 — Multilayer metal core Printed Board with blind and/or buried vias (may include microvias)

1.3.3 Selection for Procurement Performance class **shall** be specified in the procurement documentation.

The procurement documentation **shall** provide sufficient information to fabricate the printed board and ensure that the user receives the desired product. Information that should be included in the procurement documentation is to be in accordance with IPC-2611 and IPC-2614.

The procurement documentation **shall** specify the thermal stress test method to be used to meet the requirement of 3.6.1. Selection **shall** be from those depicted in 3.6.1.1, 3.6.1.2 and 3.6.1.3. If not specified (see 5.1), the default **shall** be per Table 1-2.
