

Dynacast (Singapore) Pte Ltd

Dynacast is a leading global manufacturer of small precision engineered components which are made through proprietary multi-slide die casting and tooling techniques. With world-class technology and processes, Dynacast serves any industry at virtually any volume with superior components and outstanding part-to-part consistency. Today, Dynacast operates 21 manufacturing facilities in 16 countries on 4 continents. Dynacast manufactures miniature to large precision components in a broad range of zinc, aluminum, and magnesium alloys, using hot and cold chamber die-casting technologies.

Dynacast's dedicated team of engineers assists with designing your project for our process – avoiding expensive secondary operations. Wherever you are in the world, whatever you need from your die-casting precision components, we can help.
